Dear Mr Calleja Crespo and Mr Aguiar Machado,

**Complaint against the breach of species protection obligations under Article 12 of the Habitats Directive in relation to cetaceans**

**The problem**

Bycatch is considered the greatest global threat to the conservation of cetaceans. It is also the greatest threat to cetaceans in Europe, where incidental catches are of serious concern – and in many cases have population impact levels – for a number of cetacean species like the Baltic harbour porpoise and the Bay of Biscay common dolphin.

The aforementioned governments have systematically failed to implement conservation measures that ensure that bycatch does not have a significant impact on these species. The governments have also failed to establish and enforce monitoring systems that allow the necessary understanding of the impact of bycatch on many populations of cetaceans. In turn, this further impairs the ability of these governments to take the necessary measures to maintain or restore these populations at favourable conservation status.
Breaches of law

Article 12 of the Habitats Directive establishes the following obligations for Member States in relation to cetaceans:

a) Obligation to establish a system to monitor the incidental capture and killing of cetaceans [Art. 12(4) of the Habitats Directive],

b) Obligation to, in light of the information gathered by the monitoring system, take further research or conservation measures as required to ensure that incidental capture and killing does not have a significant negative impact on the species concerned [Art. 12(4) of the Habitats Directive],

c) Obligation to establish a system of strict protection for cetaceans, prohibiting all forms of deliberate disturbance, capture and killing of cetaceans in the wild [Arts. 12(1)(a), 12(1)(b) and 12(3) of the Habitats Directive].

The governments of Belgium, Denmark, Estonia, Finland, France, Germany, Ireland, Latvia, Lithuania, Netherlands, Poland, Portugal, Spain, Sweden, and the United Kingdom are in breach of these obligations and have even failed to fully comply with Regulation 812/2004 – the minimum expected from Member States in relation to their duty to monitor and minimise the likelihood of killing, capture or disturbance to cetaceans by their fleets. None of the governments of these Member States has implemented concrete, specific, coherent and coordinated measures that prevent the killing, capture or disturbance of cetaceans in their waters or by their fishing fleets.

In consequence, we submit this complaint and urgently ask you to take infringement action against the governments of Belgium, Denmark, Estonia, Finland, France, Germany, Ireland, Latvia, Lithuania, Netherlands, Poland, Portugal, Spain, Sweden, and the United Kingdom for ongoing breaches of Article 12 of the Habitats Directive with regard to the strict protection of cetaceans and the obligations on the Member States to establish a system to monitor the incidental capture and killing of cetaceans and to take further research or conservation measures, as required, to ensure that incidental capture and killing does not have a significant negative impact on the species concerned.

We kindly request you to provide us with a written response to our complaint.

For further information regarding the complaint, your services can contact Sarah Dolman, Whale and Dolphin Conservation (sarah.dolman@whales.org) and/or Tatiana Lujan, ClientEarth (tlujan@clientearth.org).

Yours sincerely

Chris Butler-Stroud
