Phone number:

Do you have any special dietary requirements?

.....

I have accessibility needs: YES/NO

Which workshop would you like to take part in? Please choose ONE.

1. Fleet restructuring and capacity reduction using rights-based tools

- Can transferrable rights be designed to deliver a socially, economically and environmentally sustainable fleet, and how?
- Are RBM tools adequate for all fisheries and fleet segments?

2. Fleet restructuring and capacity reduction using alternatives to rights-based tools

- Is there a need for legally binding fleet reduction and restructuring targets?
 - How can targets be set in a science-based and ambitious manner?
 - Should targets for changes in fleet structure be set on a fishery-by-fishery basis, on a region-by-region, or on a Member State by Member State?
 - How to ensure effective implementation?

3. How should the EU fleet look after the implementation of capacity reduction and fleet restructuring policies?

- What makes up a fleet which meets the sustainability criteria outlined in the morning session?

Please note that if certain workshops are under or oversubscribed, we will ensure that all workshops are balanced by moving participants to a different workshop.

Please send back your registration form to nkontoulis@seas-at-risk.org by 15 October 2009.
