

#RestoreOcean

TO FIGHT CLIMATE CHANGE

NOW OR NEVER

UN Secretary-General António Guterres called the climate crisis a "ticking time bomb", after experts revealed we are facing our last chance to avert climate disaster.

If EU politicians are serious about protecting people and planet and living up to their climate commitments, they must seize this legacy moment to restore nature.

SUPER SEAGRASS

Seagrass meadows absorb carbon

35 times

faster than rainforests!

We need to keep ecosystems healthy so they can keep absorbing carbon pollution. We will not solve climate change without nature.

RENEWABLES RESTORATION

Nature-positive design of offshore wind farms can help regenerate some species and habitats, including fish and molluscs.

No surprise then that the European Power Sector supports the Nature Restoration Law!
